THE FIELD, MAPPED

THE AI LANDSCAPE

Artificial Intelligence is a nested discipline. Each ring adds capability, data appetite and compute. Our program takes you from the outer ring to the frontier core.

01

Foundations

Python, statistics, linear algebra, data wrangling

02

Classical ML

Regression, SVM, ensembles, clustering, feature engineering

03

Deep Learning

CNNs, RNNs, attention, transfer learning, optimisation

04

Generative & Agentic AI

Transformers, LLM fine-tuning, RAG, tool-using agents

DEEP LEARNING ENGINEERING

Beyond fitting models: build, debug and optimise neural architectures the way production teams do.

Neural Network Internals

- Backpropagation from scratch
- Activation & loss design
- Weight init & normalisation
- Vanishing / exploding gradients

Optimisation at Scale

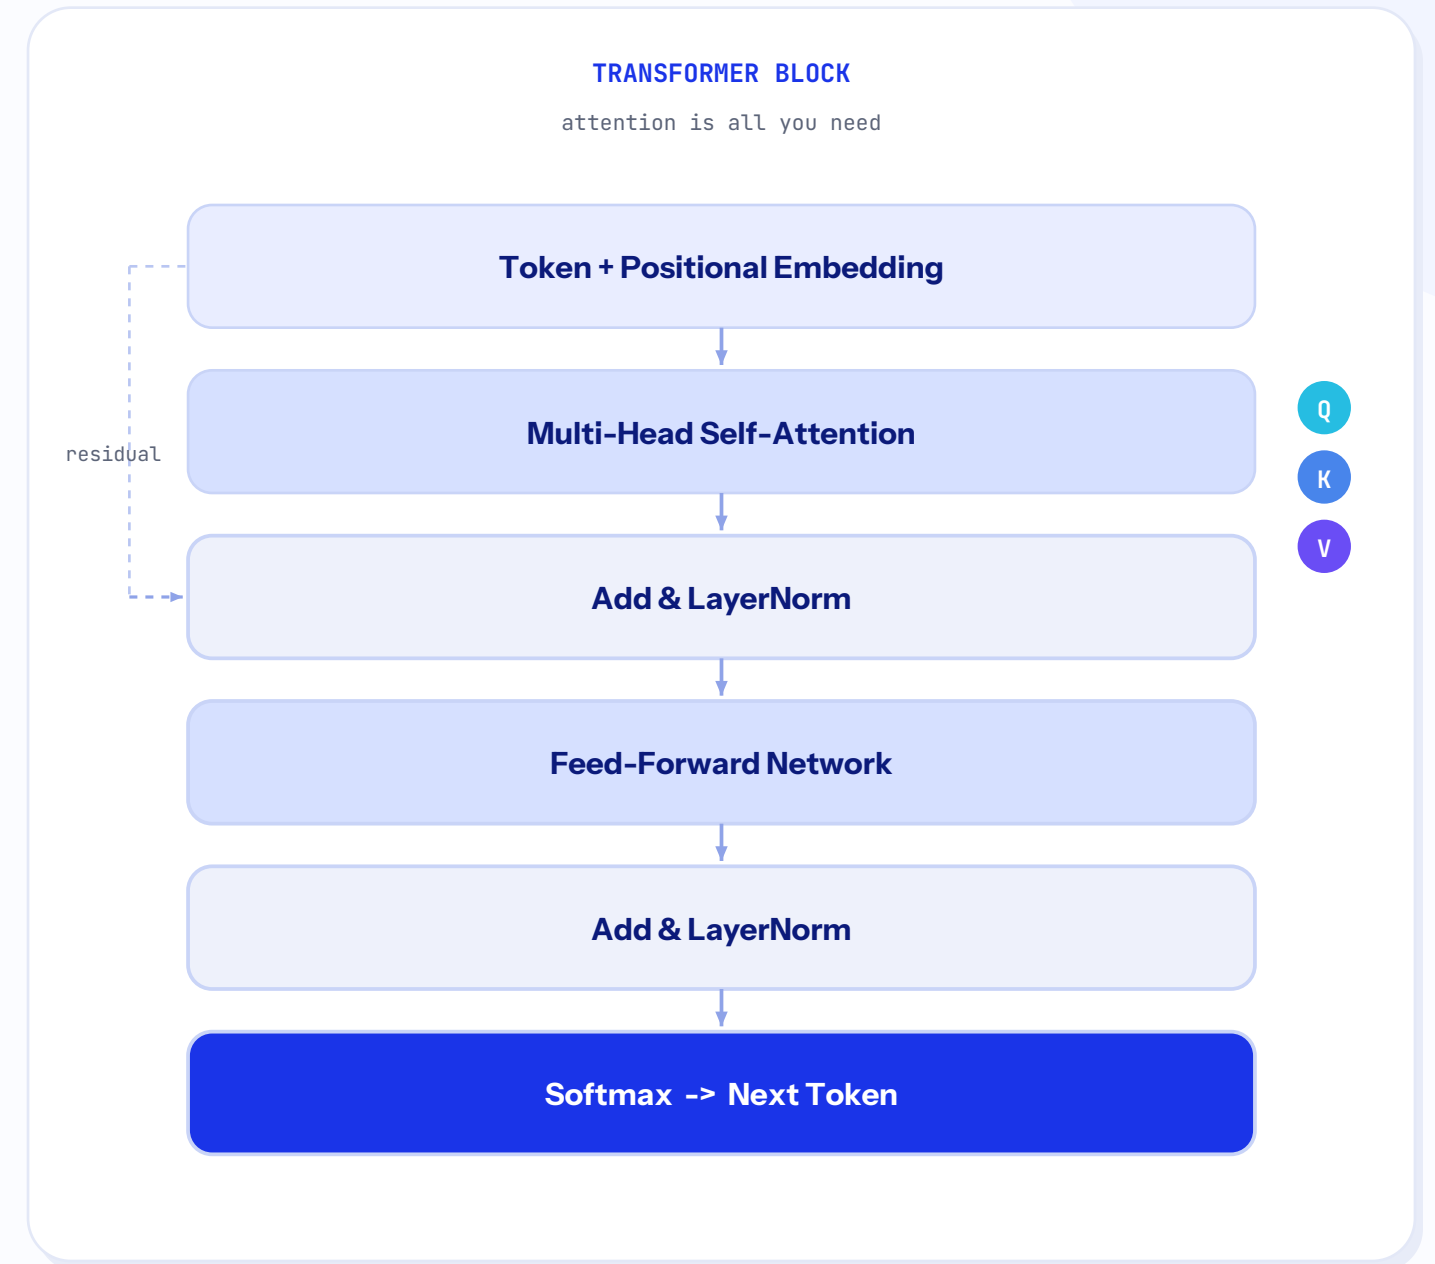

- SGD, Adam, AdamW
- LR schedules & warmup
- Mixed precision training
- Distributed & multi-GPU

Computer Vision

- CNNs, ResNet, EfficientNet
- Object detection with YOLO
- Segmentation & tracking
- Vision Transformers (ViT)

Sequence Modelling

- RNN, LSTM, GRU
- Attention mechanisms
- Time-series forecasting
- Audio & speech models

GENERATIVE AI & LLMS

The frontier stack: how large language models are trained, adapted, grounded and shipped safely.

Transformer Foundations

- Self-attention & multi-head
- Positional encodings
- Tokenisation & context windows
- Scaling laws

Adapting Models

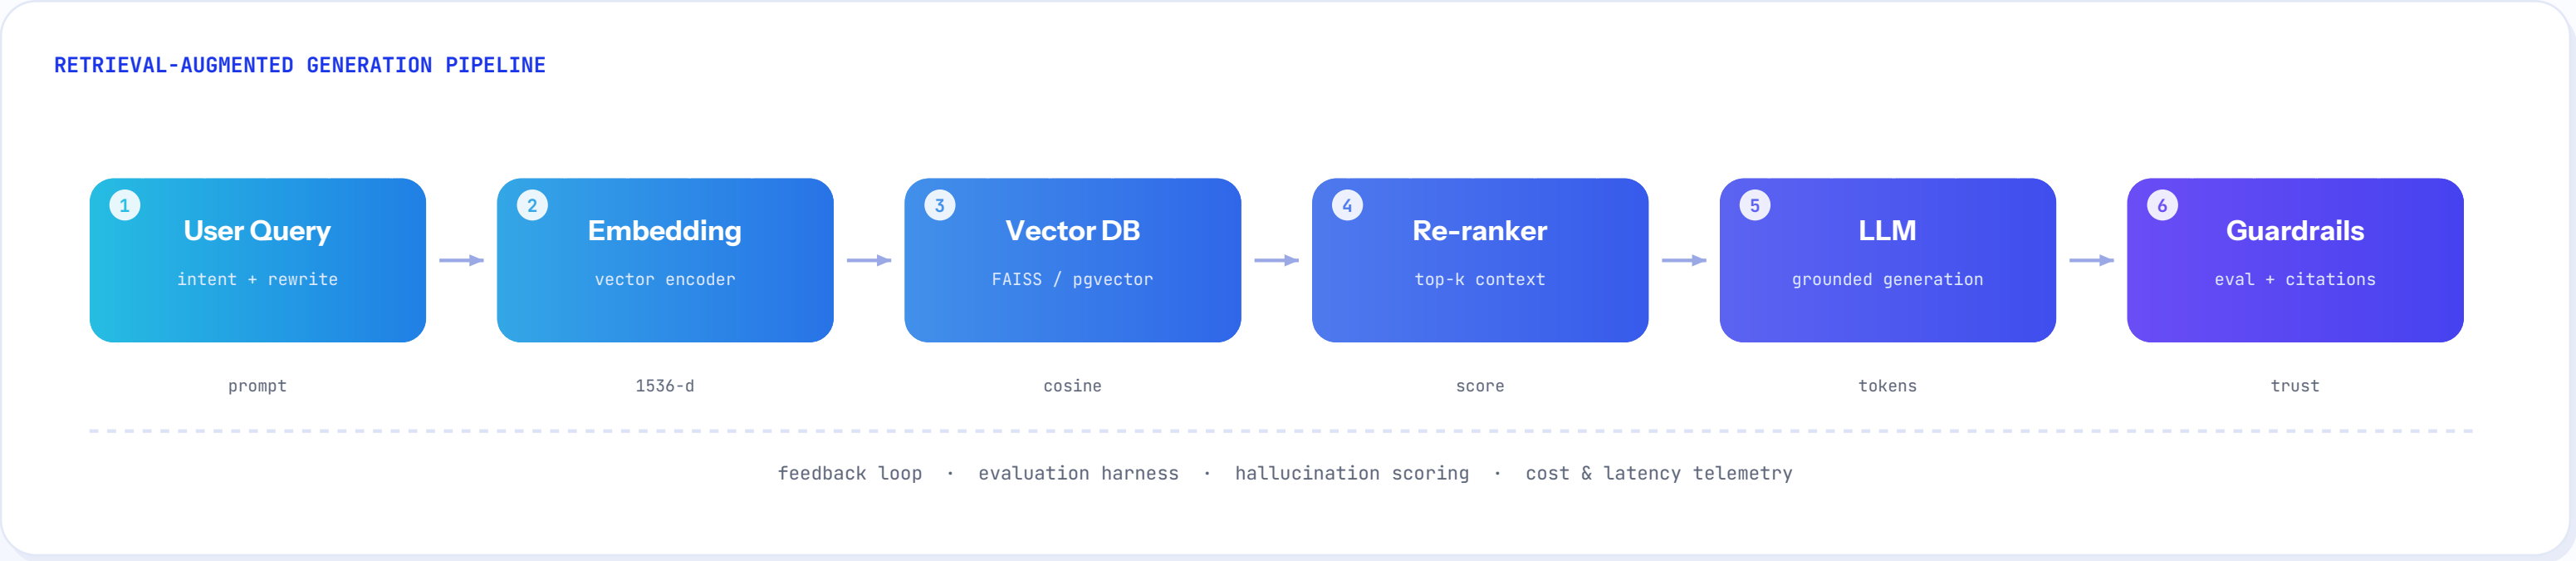

- Prompt engineering patterns
- Fine-tuning vs LoRA / QLoRA
- Instruction tuning & RLHF
- Quantisation & distillation

Grounding with RAG

- Embeddings & vector stores
- Chunking & hybrid search
- Re-ranking strategies
- Citation & hallucination control

Diffusion & Multimodal

- Latent diffusion models
- ControlNet & image editing
- CLIP & multimodal embeddings
- Speech: Whisper & TTS

AGENTIC AI & MLOPS

Autonomous systems that act, and the engineering discipline that keeps them reliable in production.

AI Agents

- Tool & function calling
- Planning and reflection loops
- Short & long-term memory
- Multi-agent orchestration

Reinforcement Learning

- MDPs, Q-learning, DQN
- Policy gradients & PPO
- Reward modelling
- Simulation environments

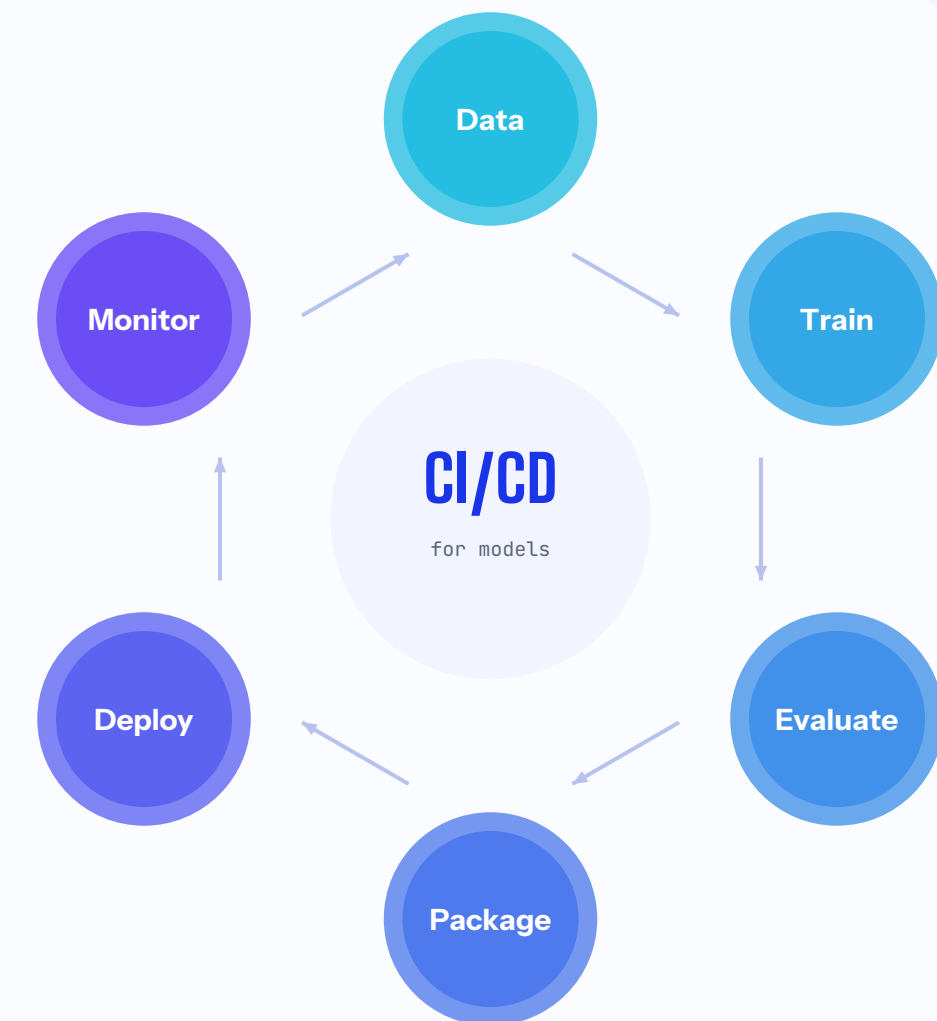

MLOps in Production

- Experiment tracking (MLflow)
- Model registry & versioning
- CI/CD for models
- Drift detection & retraining

Serving & Scale

- FastAPI + Docker services
- GPU inference & batching
- Caching, cost & latency
- Observability dashboards

MLOPS LIFECYCLE

RESPONSIBLE & APPLIED AI

Trustworthy systems, domain applications and the governance frameworks enterprises now require.

Explainability

- SHAP & LIME
- Feature attribution
- Model cards & documentation
- Counterfactual analysis

Safety & Governance

- Bias and fairness metrics
- Red-teaming & jailbreak tests
- Privacy, PII & data lineage
- EU AI Act & ISO 42001 basics

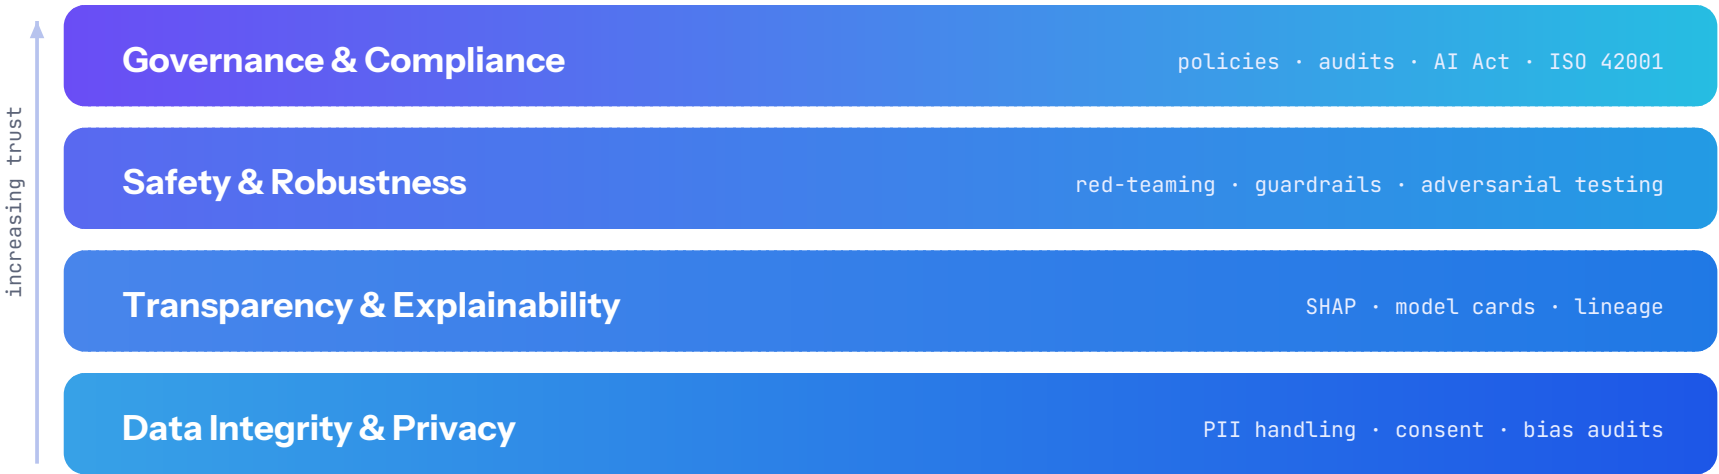

Domain Applications

- Healthcare diagnostics
- Fintech risk & fraud
- Industrial predictive maintenance
- Retail personalisation

Frontier Topics

- Graph neural networks
- Federated & edge AI
- Neuro-symbolic reasoning
- Quantum machine learning

THE TRUSTWORTHY AI STACK

AUDIT SCORECARD

ADVANCED CAPSTONE PROJECTS

Twelve production-grade builds. Every project ships with a dataset, an evaluation harness, a deployment target and a code review from an industry mentor.

01 Enterprise RAG Assistant

Chat over 10k private documents with citations, caching and hallucination scoring.

LangChain · pgvector · FastAPI

02 LLM Fine-Tuning Lab

Domain-adapt a 7B open model on a single GPU and benchmark against the base.

LoRA · QLoRA · PEFT

03 Autonomous AI Agent

A multi-step agent that browses, executes code and self-corrects with guardrails.

Tool calling · Planner · Memory

04 Real-Time Vision System

Edge-deployed detection and tracking pipeline running at 30 FPS.

YOLOv8 · OpenCV · ONNX

05 Time-Series Forecaster

Demand forecasting with uncertainty intervals and drift alerts.

Prophet · LSTM · Transformers

06 Recommender at Scale

Hybrid collaborative + content engine with online A/B evaluation.

Two-tower · Embeddings · Faiss

07 Speech & Multimodal AI

Voice-to-insight pipeline plus image generation with safety filters.

Whisper · CLIP · Diffusion

08 MLOps Delivery Pipeline

Automated retraining, model registry, canary rollout and monitoring.

Docker · MLflow · GitHub Actions

09 Responsible AI Audit

Explainability report, bias metrics and adversarial prompt testing.

SHAP · Fairness · Red-teaming

THE ADVANCED AI TOOLCHAIN

CORE & DATA

- Python 3.12
- NumPy / Pandas
- Polars
- SQL + pgvector
- Airflow

MODELLING

- scikit-learn
- PyTorch
- TensorFlow / Keras
- XGBoost
- Optuna

GENERATIVE AI

- Transformers
- LangChain
- LlamaIndex
- LoRA / PEFT
- Diffusers

VISION & SPEECH

- OpenCV
- YOLOv8
- CLIP
- Whisper
- ONNX Runtime

DEPLOYMENT

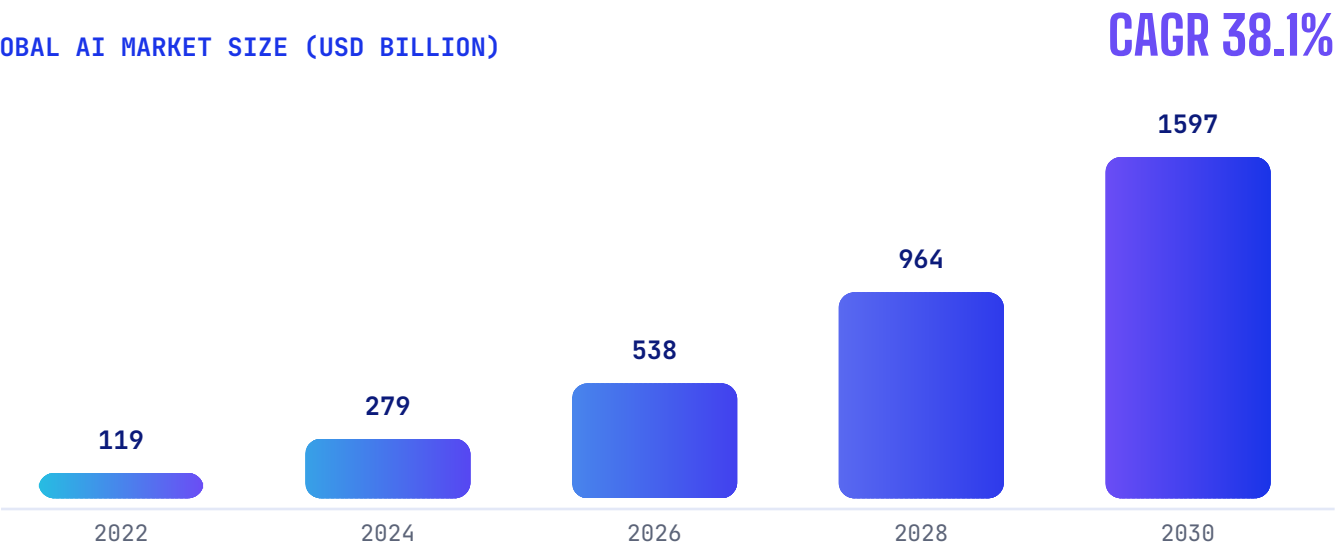

- FastAPI
- Docker
- MLflow
- Kubernetes
- Triton

CLOUD & OPS

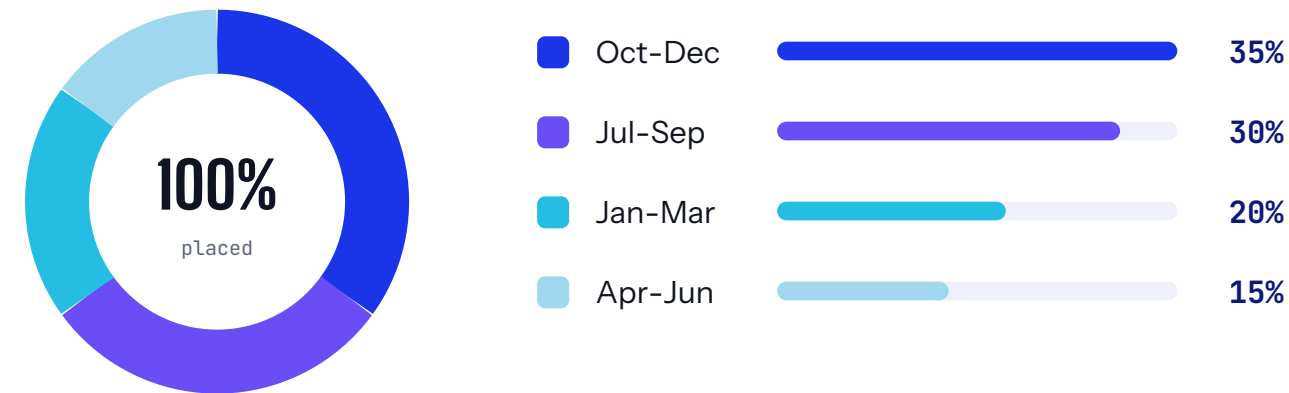

- AWS SageMaker
- Azure AI
- Google Vertex
- Weights & Biases
- Grafana

YOUR 24-WEEK PATH

LEARNING ROADMAP

PROGRAM AT A GLANCE

24

WEEKS, SELF-PACED

15+

LIVE MENTOR SESSIONS

12

CAPSTONE PROJECTS

6

MNC CERTIFICATIONS

100%

PLACEMENT ASSISTANCE

Eligibility: any UG/PG stream · Basic programming helpful, not mandatory · Weekday & weekend batches

AN UNFAIR ADVANTAGE

01

Self-paced tracks

Choose your speed, master the skills

02

Industry playground

Live datasets from partner MNCs

03

Mentors from MNCs

Engineers from Microsoft, IBM, Deloitte

04

Wipro DICE ID

Globally recognised accreditation

05

150+ hiring partners

Internship and placement pipeline

06

Unlimited mocks & GDs

Interview readiness every week

07

Performance stipend

Earn while you build

08

Lifetime LMS access

Recorded lectures, anytime

09

24x7 dedicated support

Never blocked for long

10

MNC certifications

Microsoft, Cisco, IBM, Adobe

11

R&D content library

Frontier papers, distilled

12

1:1 career counselling

Resume, portfolio, positioning

ACCREDITED CERTIFICATIONS

Every learner receives industry-recognised accredited certificates for internship, industrial training and the AI capstone project — each with a unique ID and QR verification.

Internship Certificate
ACCREDITED • AI TRACK

Industrial Training
ACCREDITED • AI TRACK

Project Completion
ACCREDITED • AI CAPSTONE

VERIFIED. TRACEABLE. EMPLOYER-READY.

Every certificate carries a unique credential ID, QR verification link and issue date for instant recruiter validation.

- UNIQUE ID
- QR VERIFIED
- DATED ISSUE
- SHAREABLE

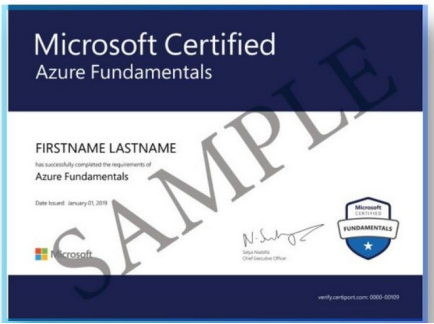

PROFESSIONAL CERTIFICATIONS

GLOBAL MNC CERTIFICATIONS

Learners are prepared for and certified through globally recognised professional certification programs from the world's leading technology companies. Exam prep is included at no extra cost.

Cisco
CYBERSECURITY CCST

Microsoft
AZURE FUNDAMENTALS

IBM
INTERNET OF THINGS

Autodesk
CERTIFIED USER

ESB
ENTREPRENEURSHIP

EXAM PREP INCLUDED — NO EXTRA COST

Structured prep tracks, practice labs, mock exams and mentor review for every professional certification above.

- PRACTICE LABS
- MOCK EXAMS
- MENTOR REVIEW
- ON-CAMPUS TEST

AUTHORISED PARTNER

AUTHORISED PARTNERS

Edufyi Tech Solutions is an authorised certification and testing partner for leading global certification bodies — learners certify on campus with globally accepted credentials.

ADOBE

MICROSOFT

QUICKBOOKS

AUTODESK

CISCO

ESB

AUTHORISED TESTING & CERTIFICATION CENTRE

Scheduling, proctoring and results handled in-house — globally valid credentials, certified on campus.

ON-CAMPUS EXAMS

PROCTORED

GLOBAL VALIDITY

KICKSTART YOUR CAREER GROWTH WITH

EDUFYI TECH SOLUTIONS

Enroll in the Advanced Artificial Intelligence professional program — industrial training, internship, MNC certifications and placement assistance with 150+ partnered companies.
