WHAT IS BUSINESS ANALYTICS?

Business Analytics converts raw operational data into decisions. It blends statistics, data engineering, visual storytelling and machine learning to explain what happened, why it happened, what will happen next, and what a business should do about it.

SCOPE & MARKET GROWTH

The global big-data and business-analytics market was valued at \$198.08B in 2020 and is projected to reach \$684.12B by 2030 — a 23.5% CAGR. Analytics now underpins automation, AI, cloud, IoT and every profit-critical function.
