UNLOCKING THE POWER OF INNOVATION

60-DAY MENTORSHIP

11 LIVE SESSIONS

6 CAPSTONE PROJECTS

CONSTRUCTION PLANNING

An advanced, industry-mentored program on planning, scheduling, cost control and digital delivery — built around Primavera P6, BIM 4D/5D, Lean and Earned Value.

Careers built on real project work

Edufyi Tech Solutions transforms the learning journey of engineering students and early-career professionals through virtual internships and mentor-led training. Every domain ships with six real-time and capstone projects, so learners graduate with a portfolio — not just a certificate.

Mission

Equip students with virtual internships and real-world projects for successful placement through industry mentorship.

Vision

Transform education by linking academic learning with practical site and planning experience.

How we teach

Live mentor sessions, guided tool labs, weekly reviews and a graded capstone defence at the end of the cohort.

PROGRAM SNAPSHOT

60

DAYS OF MENTORSHIP

11

STRUCTURED SESSIONS

06

REAL-TIME PROJECTS

04

CERTIFICATIONS

TIME SPLIT

● 45% Live mentoring

● 30% Project work

● 25% Tools lab

Who should join

Civil / Mechanical / Architecture students, site engineers, QS and billing engineers, and PMC professionals moving into planning, scheduling and project controls roles. No prior software experience is required — the tool labs start from installation and first schedule.

11 sessions • foundation to advanced

TRACK 01 • FOUNDATION

01

Induction & Planning Mindset

Program roadmap, planner's role, industry landscape, tools setup.

02

Introduction to Construction Planning

Key terms, planning hierarchy, project management fundamentals.

03

Project Lifecycle & Phases

Pre-construction, construction, close-out; stakeholders, charter, scope statement.

TRACK 02 • SCHEDULING ENGINE

01

Work Breakdown Structure (WBS)

WBS dictionary, activity coding, quantity take-off, cost & resource estimating.

02

Scheduling Techniques

Gantt, CPM, PERT, precedence logic, lags, calendars, float & baseline.

03

Resource Planning & Allocation

Labour/material/plant loading, levelling, productivity norms, budgeting.

4D SCHEDULE

CPM / CRITICAL PATH

EARNED VALUE / S-CURVE

Track 03 • running the project

Risk Management

- Risk identification, qualitative & quantitative assessment
- Monte Carlo schedule risk analysis & contingency sizing
- Risk register, response strategies and mitigation plans

Project Controls & Monitoring

- Control systems, baselines and change control boards
- Progress measurement, physical % complete, look-ahead plans
- Variance analysis, forecasting and recovery schedules

Contracts & Legal Aspects

- Contract types, FIDIC / NHAI / CPWD frameworks
- EOT claims, delay analysis and disruption
- Dispute avoidance, arbitration and claim documentation

Quality Assurance & Safety

- QMS, ITP, checklists and NCR handling
- Safety planning, HIRA, statutory compliance
- Integrating quality and HSE into the schedule

Case studies & practical application

Metro viaduct, high-rise residential, industrial plant and highway packages are dissected as live case studies — then rebuilt by your team as a complete construction plan with schedule, budget and risk register. Each review is graded against real client reporting standards.

Beyond the classic planning syllabus

01 BIM 4D / 5D Integration

Model-based sequencing, Navisworks Timeliner, clash-informed logic and quantity-linked cost loading.

02 Primavera P6 & MS Project Lab

Enterprise EPS/OBS setup, activity codes, resource curves, multi-project portfolios, P6 reporting.

03 Earned Value Management

PV/EV/AC, CPI-SPI, TCPI, EAC forecasting and integrated cost-schedule performance reporting.

04 Lean Construction & Last Planner

Pull planning, LPS, percent plan complete, takt-time planning and constraint logs.

05 Forensic Delay Analysis

Windows, TIA, as-planned vs as-built, concurrency and EOT entitlement narratives.

06 Schedule Risk & Monte Carlo

@Risk / Safran style probabilistic modelling, P50-P80 dates and contingency drawdown.

07 AI & Data in Planning

Predictive delay analytics, generative sequencing, Power BI dashboards and automated progress reporting.

08 Digital Twin & Reality Capture

Drone / LiDAR progress capture, 360 walkthroughs and model-to-site reconciliation.

09 Sustainable & ESG Planning

Carbon-aware sequencing, green rating deliverables, waste and resource efficiency.

10 Procurement & Supply Chain

Long-lead tracking, procurement schedules, vendor float and logistics planning.

TOOL STACK YOU WILL OPERATE

Primavera P6

MS Project

Navisworks

Revit

AutoCAD

Power BI

Excel VBA

Candy / QS

Safran Risk

Procore

Licensed / trial access, guided installation and lab files are provided for every tool.

Six real-time deliverables

PROJECT 01

G+20 Residential Tower

Full WBS, 900-activity P6 baseline, resource-loaded schedule and cash-flow curve.

PROJECT 02

Metro Viaduct Package

Segment casting & erection cycle planning with 4D sequence animation.

PROJECT 03

Industrial Plant Shutdown

Short-interval planning, takt sequencing and critical path compression.

PROJECT 04

Highway 25 km Package

Linear scheduling / time-location charts and machinery productivity modelling.

PROJECT 05

Commercial Fit-out

5D cost integration, EVM tracking dashboard and monthly client report pack.

PROJECT 06

Delay Claim Simulation

As-planned vs as-built forensic analysis with an EOT claim narrative.

CAREER OUTCOMES

Planning Engineer

Project Controls Analyst

Scheduler (P6)

Cost & QS Engineer

BIM 4D Coordinator

PMC Consultant

DELIVERY FORMAT

Live online

2 mentor sessions / week, recordings available

Tool labs

Hands-on P6, Navisworks and Power BI workshops

1:1 reviews

Portfolio, resume and mock interview support

CERTIFICATIONS AWARDED
