

SPECIALISED PROGRAM // PROFESSIONAL // INTERNSHIP + TRAINING

CYBER SECURITY WITHOUT BLIND SPOTS

Zero Trust architecture, AI-driven threat detection and 24x7 managed response — taught and practised through six real-time industry projects, guaranteed internships and globally recognised certifications.

ZERO TRUST

XDR / SOC 24x7

CLOUD & AI SECURITY

OT / ICS

ETHICAL HACKING

COMPLIANCE

WHO ARE WE?

At Edufyi Tech Solutions, we are dedicated to transforming the educational journey for college students by offering cutting-edge virtual internships and comprehensive training programs. Our approach combines industry mentorship with practical experience, providing each student with six real-time and capstone projects per course or domain. These projects are designed to equip students with the skills and experience needed to secure their dream jobs upon graduation.

OUR UNIQUE FEATURES

01

Choose your Speed

Master the skills at your own pace

02

Industry Project Playground

Hands-on real-time build environment

03

Resume Building & Aptitude

Grooming for interviews and tests

04

Learn from Industry Mentors

MNC leaders and startup founders

05

100% Placement Assistance

End-to-end hiring support

06

Exclusive R&D Content

Learning content from leading MNCs

07

Unlimited Mocks & GDs

Interview and group discussion practice

08

24x7 Dedicated Support

Always-on learner assistance

09

Wipro DICE ID Accredited

Globally recognised certifications

10

Internship with 150+ Companies

Guaranteed internship placement

11

1:1 Counselling Sessions

Personal career guidance

12

Additional MNC Certifications

Microsoft, Cisco, IBM, Adobe & more

13

Certified Bootcamps & Webinars

Live expert-led sessions

14

Personalised LMS

Learning management, fully tracked

15

Recorded Lectures

Access anytime, anywhere

16

Skill Up & Cash In

Performance-based stipend

17

Mentorship by Experts

Live sessions with practitioners

18

Hiring Partner Access

Direct access to our partner network

WHAT IS CYBER SECURITY?

Cyber Security is the practice of protecting systems, networks, and programs from digital attacks. These cyberattacks are usually aimed at accessing, changing, or destroying sensitive information; extorting money from users via ransomware; or interrupting normal business processes. Implementing effective cybersecurity measures is particularly challenging today because there are more devices than people, and attackers are becoming more innovative.

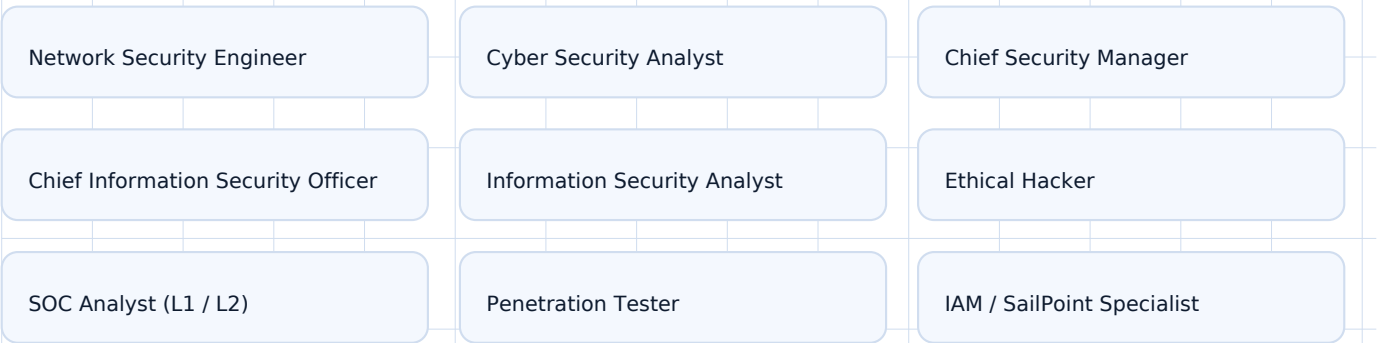

SCOPE OF CYBER SECURITY

The global Cyber Security services market is expected to reach USD 192.70 billion by 2028, registering a CAGR of 10.2% over the forecast period. Cyber Security has a wide range of applications across:

CAREER OPPORTUNITIES

WHY POSTURE BEATS PRODUCTS

Attackers no longer break in — they log in. Identity abuse, cloud misconfiguration and AI-assisted social engineering now drive the majority of successful intrusions. Tool sprawl adds cost without adding visibility.

< 60 min
median attacker breakout time

80%
of breaches involve compromised identity

70%
of cloud incidents trace to misconfiguration

24x7
monitoring required for ransomware containment

FUSION SOC

DETECT > TRIAGE > CONTAIN > RECOVER

Telemetry from endpoint, identity, cloud, network and OT correlated in one detection engine, with analyst-verified escalation and a 15-minute critical response SLA.

KILL-CHAIN COVERAGE ACROSS EVERY STAGE

01
RECON

02
INITIAL ACCESS

03
PRIVILEGE ESC.

04
LATERAL MOVE

05
EXFILTRATION

06
IMPACT

HOW CAN YOU START YOUR JOURNEY?

Enrol in our specialised program, learn from industry experts, get guaranteed internships, job opportunities and work on 6+ advanced industry-based projects. The specialisation helps you stay abreast of the latest cyber security trends — ethical hacking, Windows & Linux installation, password cracking, hiding data, cloud computing and building systems that withstand cyber attacks.

6+ PROJECTS
Real-time industry & capstone builds

150+ COMPANIES
Guaranteed internship network

100% ASSISTANCE
Placement and interview support

LIVE MENTORS
MNC experts and startup founders

WHAT WE DEPLOY

01 ZERO TRUST ARCHITECTURE

Identity-centric segmentation, continuous verification, ZTNA replacing legacy VPN, least-privilege by default.

02 MANAGED XDR & 24x7 SOC

Cross-layer detection engineering, MITRE ATT&CK mapped use cases, threat hunting and 15-min critical SLA.

03 CLOUD SECURITY (CNAPP)

CSPM, CIEM, workload and container runtime protection across AWS, Azure and GCP with IaC guardrails.

04 AI-DRIVEN DETECTION

Behavioural analytics and LLM-assisted triage that cut alert noise, plus security for your own AI and LLM stack.

05 IDENTITY & PAM

Phishing-resistant MFA, passkeys, privileged access vaulting, just-in-time elevation and joiner-mover-leaver control.

06 OT / ICS & IoT SECURITY

Passive asset discovery, Purdue-model segmentation, protocol-aware monitoring for plants and critical utilities.

07 OFFENSIVE SECURITY

Red teaming, adversary emulation, purple-team validation, continuous attack surface and breach simulation.

08 DEVSECOPS & SUPPLY CHAIN

SBOM, dependency and secrets scanning, signed builds, SLSA-aligned pipelines and third-party risk assurance.

09 DATA PROTECTION & DLP

Discovery and classification, encryption and key management, DLP for SaaS, email and generative-AI usage.

10 RANSOMWARE RESILIENCE

Immutable backups, isolated recovery vault, tabletop exercises and tested recovery-time objectives.

11 POST-QUANTUM READINESS

Crypto-agility assessment, certificate inventory and phased migration to quantum-safe algorithms.

12 GRC & COMPLIANCE

ISO 27001, SOC 2, PCI DSS, HIPAA, GDPR and India DPDP Act — audit-ready evidence and continuous control monitoring.

INDUSTRIAL TRAINING

Six live instructor-led sessions covering the complete cyber security stack, followed by a graded quiz, six industry projects and a capstone internship.

SESSION 1

ALL ABOUT CYBER SECURITY

- What is Cyber Security
- Emerging scope of Cyber Security
- Challenges faced in implementation
- Case study: Cyber Security in politics
- What are ransomware attacks
- Opportunities in Cyber Security
- Forms of Cyber Security & global attack analysis
- Fundamentals and terminologies
- Relevance of CIA triad in Cyber Security

SESSION 2

PILLARS OF CYBER SECURITY

- What is Confidentiality
- Case study: Coca-Cola and hospitals
- Threats to confidentiality: hackers, masqueraders, unauthorized users, unprotected downloads, malware
- What is Integrity
- Relevance of Availability and threats to it
- DoS and DDoS
- What is Non-Repudiation
- Importance of Accountability
- What is AAA and its relevance

SESSION 3

CYBER SECURITY DOMAINS

- Identity and Access Management (IAM)
- What is Single Sign-On
- Security Information and Event Management (SIEM)
- Threat and Vulnerability Management (TVM)
- Tools used in the domains
- What is Penetration Testing
- Types: critical infrastructure, network, information
- End-user security
- Application security

SESSION 4

ANTIVIRUS FUNDAMENTALS

- What is a virus
- Worms, Spyware, Trojans, Adware
- Key loggers
- Case study: Pegasus spyware
- Relevance and features of antivirus software
- Fundamentals of antivirus
- Cyber security threats

INDUSTRIAL TRAINING (CONTINUED)

SESSION 5

ETHICAL HACKING

- What is Ethical Hacking
- Goals of Ethical Hacking
- Types of hacking
- Why we need Ethical Hacking
- Threats to Ethical Hacking
- Physical and non-physical threats
- Sources of vulnerabilities
- Vulnerability management
- Logical threats and preventive measures

SESSION 6

PHASES OF ETHICAL HACKING

- Reconnaissance and grouping information
- Types of footprinting
- What is scanning: port and vulnerability scanning
- Network mapping
- Vulnerability identification tools
- Operating system fingerprinting
- Gaining access, maintaining access
- Covering tracks
- Hacking and defences

QUIZ / ASSESSMENT

Graded evaluation after the industrial training module — required for certification.

10 / INTERNSHIP

SIX INDUSTRY PROJECTS

PROJECT 01

Network vulnerability assessment & hardening report

PROJECT 02

Phishing simulation and awareness campaign

PROJECT 03

Web application penetration testing (OWASP Top 10)

PROJECT 04

Malware & antivirus behaviour analysis lab

PROJECT 05

SIEM log monitoring and incident response playbook

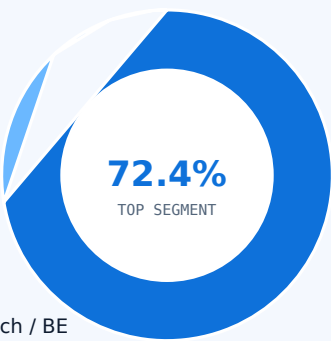

PROJECT 06

Capstone: end-to-end secure infrastructure build

PLACEMENT PERFORMANCE

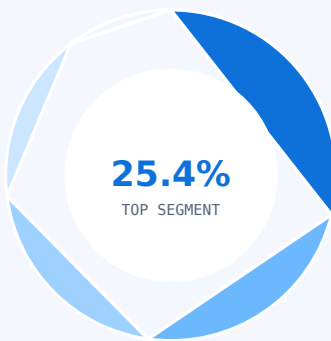

Verified programme analytics across learner profiles, hiring sectors, quarterly placements and offered roles.

LEARNER'S BACKGROUND

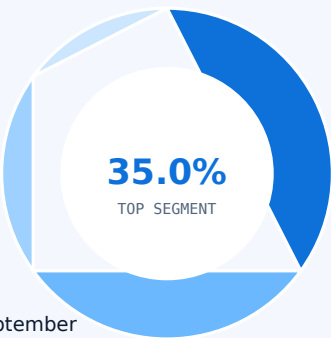

UG - BTech / BE	72.4%
UG Management Degree	15.6%
Post-Graduates	6.4%
UG Arts / Social Sciences	4.2%
Working Professionals	1.4%

PLACEMENTS BY INDUSTRY

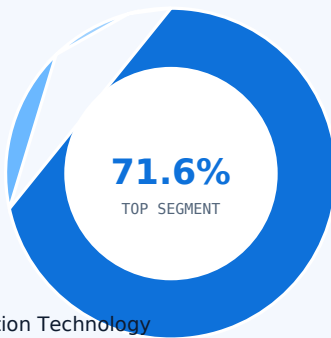

SaaS	25.4%
PaaS	20.6%
Med-tech	18.3%
Ed-tech	14.7%
Fintech	9.1%

QUARTERLY PLACEMENT ANALYSIS

July - September	35.0%
October - December	30.0%
January - March	20.0%
April - June	15.0%

OFFERED PROFILES & FIELDS

Information Technology	71.6%
Business & Management	16.2%
Operations	8.1%
Core Field	4.1%

ACCREDITED CERTIFICATIONS.

Every learner receives industry-recognised, accredited certificates on completion of the internship, industrial training and capstone project modules.
