Learning engineered for employability

Edufyi Tech Solutions transforms the educational journey of college students through cutting-edge virtual internships and industry-grade training. Every learner ships six real-time and capstone projects per domain, mentored by engineers and data scientists from leading MNCs and funded startups — so graduation day starts with an offer letter, not a job hunt.

WHY CHOOSE US

Flexible Pace

Choose your speed, master the skills

Project Playground

Industry datasets & real problem statements

Career Lab

Resume building, aptitude & mock interviews

MNC Mentors

Learn from MNC leaders & startup founders

R&D Content

Exclusive research material from top MNCs

Certifications

Microsoft, Cisco, IBM, Adobe & Autodesk

Lifetime LMS

Personalised dashboard + recorded lectures

Paid Performance

Performance-based stipend opportunities

Internship Access

150+ partner companies hiring year-round

Built with mentors who hire

Sessions are led by practising data scientists and ML engineers from MNCs and funded startups, with 1:1 counselling, unlimited mock interviews and group discussions until you are offer-ready.

WHAT IS DATA SCIENCE

Data Science turns raw, messy, high-volume data into decisions. Practitioners frame business questions, engineer features, train statistical and machine-learning models, and deploy them into products that predict, recommend and automate at scale.

The 2026 practitioner is full-stack: SQL and Python fluency, classical ML, deep learning, LLM/RAG systems, and the MLOps discipline to keep models reliable in production.

CAGR 2021–2026

27.7%

Global data science market growing from \$95.3B to \$322.9B.

Source: industry market estimates

MARKET SIZE PROJECTION (USD BILLION)

WHERE DATA SCIENCE IS APPLIED

Healthcare & Genomics

Aviation & Airlines

Cyber Security

Automotive & EV

BFSI & Fintech

Retail & E-commerce

Energy & Climate

Media & Gaming

SKILLS YOU WILL MASTER

- Python
- SQL
- Statistics
- A/B Testing
- Machine Learning
- Deep Learning
- NLP
- Computer Vision
- Time Series
- Generative AI
- RAG
- MLOps
- Spark
- Cloud Deployment
- Data Storytelling

PROGRAM ROADMAP

Eight progressive phases take you from first line of Python to a deployed, monitored AI system. Each phase ends with a graded lab; each pair of phases ends with a capstone.

01

Python & Engineering Foundations

Core Python, OOP, files, exceptions, Git, virtual envs, clean-code habits

Weeks 1-3

02

Data Wrangling & Visual Analytics

NumPy, Pandas, data cleaning, EDA, Matplotlib, Seaborn, Plotly, storytelling

Weeks 4-6

03

SQL & Modern Data Stack

Joins, window functions, CTEs, query tuning, warehousing, dbt, Power BI / Tableau

Weeks 7-9

04

Statistics & Experimentation

Distributions, hypothesis testing, A/B tests, causal inference, Bayesian basics

Weeks 10-12

05

Machine Learning at Depth

Regression, trees, XGBoost/LightGBM, clustering, feature stores, SHAP explainability

Weeks 13-17

06

Deep Learning, NLP & Vision

PyTorch, CNNs, RNN/LSTM, Transformers, HuggingFace, time-series forecasting

Weeks 18-22

07

Generative AI & LLM Engineering

Prompting, embeddings, vector DBs, RAG, fine-tuning, agents, evals & guardrails

Weeks 23-26

08

MLOps, Big Data & Deployment

Docker, FastAPI, MLflow, Airflow, CI/CD, Spark, cloud deploy, drift monitoring

Weeks 27-28

FOUNDATIONS & ANALYTICS

Python & Software Craft

Module 01 · Weeks 1-3

- Python syntax, data types, operators
- Functions, args, lambdas, decorators
- Iterators, generators, closures
- Exception handling & logging
- Git, GitHub, branching & PR workflow
- Control flow, loops, comprehensions
- OOP: classes, inheritance, dunder methods
- File I/O, JSON/CSV, context managers
- Modules, packages, virtual environments
- Clean code, PEP8, unit testing with pytest

Data Wrangling & Visual Analytics

Module 02 · Weeks 4-6

- NumPy arrays, broadcasting, vectorisation
- Missing data, outliers, type coercion
- Datetime handling & rolling windows
- Matplotlib & Seaborn grammar of graphics
- Web scraping with BeautifulSoup & APIs
- Pandas Series/DataFrame mastery
- Merging, reshaping, pivot & groupby
- Exploratory data analysis frameworks
- Interactive dashboards with Plotly
- Data storytelling for stakeholders

SQL & The Modern Data Stack

Module 03 · Weeks 7-9

- RDBMS design, keys, normalisation
- Joins, subqueries, CTEs, set operations
- Indexes, EXPLAIN plans, query tuning
- Data warehouses: BigQuery / Snowflake
- Power BI & Tableau dashboards
- DDL/DML, constraints, transactions
- Window functions & analytic queries
- Star schema & dimensional modelling
- ETL vs ELT, dbt transformations
- NoSQL primer: MongoDB & Redis

Git

NumPy

Pandas

Seaborn

Plotly

PostgreSQL

MySQL

BigQuery

dbt

Power BI

Tableau

MongoDB

Phase lab: an end-to-end EDA report

You close these three modules by pulling a live SQL dataset, cleaning it in Pandas and publishing an interactive dashboard with a written business recommendation.

Statistics, Probability & Experimentation

Module 04 · Weeks 10–12

- Descriptive stats & distributions
- Confidence intervals & hypothesis tests
- Correlation vs causation
- Causal inference: DiD, propensity scores
- Linear algebra & calculus for ML
- Central limit theorem, sampling design
- t-test, chi-square, ANOVA, non-parametrics
- A/B testing: power, MDE, sequential tests
- Bayesian thinking & priors
- Optimisation & gradient descent intuition

Machine Learning at Depth

Module 05 · Weeks 13–17

- Supervised learning workflow & leakage
- Decision trees, Random Forest, bagging
- SVM, KNN, Naive Bayes
- Dimensionality reduction: PCA, t-SNE, UMAP
- Imbalanced data, SMOTE, cost-sensitive learning
- Model evaluation: ROC-AUC, PR, calibration
- Recommender systems & collaborative filtering
- Linear/logistic regression, regularisation
- Gradient boosting: XGBoost, LightGBM, CatBoost
- Clustering: K-Means, DBSCAN, hierarchical
- Feature engineering & feature stores
- Cross-validation & hyperparameter search (Optuna)
- Explainable AI: SHAP, LIME, fairness audits
- Anomaly detection for fraud & security

TOOLING

SciPy

statsmodels

scikit-learn

XGBoost

LightGBM

CatBoost

Optuna

SHAP

imbalanced-learn

Feast

MLflow

Phase lab: a model that survives review

Design an experiment, build a baseline and a boosted model, then defend the results with cross-validation, calibration curves and SHAP explanations in a mentor code review.

DEEP LEARNING, GENAI & MLOPS

Deep Learning, NLP & Computer Vision

Module 06 · Weeks 18–22

- Neural networks, backprop, activations
- PyTorch & TensorFlow workflows
- Object detection & segmentation (YOLO, SAM)
- Attention & Transformer architecture
- Text classification, NER, summarisation
- Training tricks: dropout, batchnorm, schedulers
- CNNs, transfer learning, augmentation
- RNN, LSTM, GRU sequence models
- HuggingFace pipelines & tokenizers
- Time-series forecasting: ARIMA, Prophet, DeepAR

Generative AI & LLM Engineering

Module 07 · Weeks 23–26

- LLM landscape: GPT, Llama, Gemini, Claude
- Embeddings & semantic search
- Retrieval-Augmented Generation (RAG) design
- Fine-tuning: LoRA, QLoRA, PEFT
- Multimodal & diffusion models
- Cost, latency & token optimisation
- Prompt engineering & structured outputs
- Vector databases: FAISS, Pinecone, pgvector
- Chunking, reranking, hybrid retrieval
- Agentic workflows & tool calling
- Evaluation, hallucination control, guardrails
- Responsible AI, privacy & governance

MLOps, Big Data & Cloud Deployment

Module 08 · Weeks 27–28

- Model packaging with Docker
- Experiment tracking & registry (MLflow)
- CI/CD for ML with GitHub Actions
- Spark & PySpark distributed processing
- Cloud deploy on AWS / Azure / GCP
- Serving APIs with FastAPI & Streamlit
- Pipelines with Airflow / Prefect
- Drift, data quality & observability
- Kafka streaming fundamentals
- Cost, scaling & security best practices

Phase lab: ship it to production

Fine-tune a model, wrap it in a FastAPI service, containerise it and deploy to the cloud with experiment tracking, retraining pipelines and drift monitoring in place.

CAPSTONE PROJECTS

Every learner ships six production-style projects, each reviewed by an industry mentor and published to a portfolio-ready GitHub repository with documentation and a live demo.

PROJECT 01**Retail Demand Forecasting**

Multi-store time-series pipeline with feature engineering, LightGBM + Prophet ensemble and a Streamlit planning dashboard.

Pandas · LightGBM · Prophet

PROJECT 02**Credit Risk & Fraud Detection**

Imbalanced-data modelling, cost-sensitive thresholds, SHAP explainability and a compliance-ready decision report.

XGBoost · SHAP · imblearn

PROJECT 03**Healthcare Imaging Classifier**

Transfer-learning CNN for medical image triage with augmentation, Grad-CAM interpretability and FastAPI serving.

PyTorch · OpenCV · FastAPI

PROJECT 04**Enterprise RAG Assistant**

Document ingestion, chunking, embeddings and a vector-search chatbot with citations, evals and guardrails.

LangChain · pgvector · LLM

PROJECT 05**Customer 360 Analytics Warehouse**

SQL warehouse modelling, dbt transformations, RFM segmentation and an executive Power BI dashboard.

SQL · dbt · Power BI

PROJECT 06**End-to-End MLOps Platform**

Containerised training and inference with MLflow registry, Airflow retraining, CI/CD and drift monitoring on cloud.

Docker · MLflow · Airflow

Reviewed, documented, deployed

Each capstone is code-reviewed by a mentor, documented with a README and demo video, and deployed live — the portfolio recruiters actually open before an interview.

CAREER OUTCOMES

✓ Data Scientist

✓ Data Analyst

✓ Machine Learning Engineer

✓ AI / LLM Engineer

✓ Business Intelligence Developer

✓ Data Engineer

✓ MLOps Engineer

✓ Data Architect

✓ Analytics Consultant

✓ Product Analyst

✓ Research Analyst

✓ Decision Scientist

INDICATIVE SALARY BANDS IN INDIA (INR LAKHS PER ANNUM)

HOW YOU START

Enrol in the Edufy specialised Industrial Training & Internship program delivered with 150+ partner companies. Learn from practising experts, build six real-time projects, earn globally accepted certifications and enter placements with a portfolio that proves skill.

PLACEMENT SUPPORT INCLUDES

- ✓ Resume & LinkedIn revamp
- ✓ Unlimited mock interviews
- ✓ Group discussion practice
- ✓ Aptitude & DSA drills
- ✓ Referral to 150+ partners
- ✓ Salary negotiation coaching
