

NATIONWIDE LEARNING INITIATIVE

PSYCHOLOGY WORKSHOP

Empowering minds. Strengthening care.

An evidence-informed learning experience for students, educators and healthcare professionals.

01

02

Applied skills

03

Advanced practice

LEARN • REFLECT • PRACTISE • GROW

Learning that translates into practice

Bridging academic foundations with the changing needs of healthcare, education and human services.

OUR OBJECTIVE

Edufyi Tech Solutions creates mentor-led workshops, professional training and career pathways that turn complex concepts into practical capability.

Our psychology program combines scientific literacy, ethical practice, guided case analysis and reflective learning—helping participants understand people with rigor and respond with empathy.

1,200+

SESSIONS

15+

EXPERTS

4,000+

LEARNERS

100%

COMMITMENT

THE EDUFYI LEARNING STANDARD

Evidence aware

Current concepts, careful language and responsible scope.

Practice led

Cases, simulations, reflection and mentor feedback.

Human centred

Safety, dignity, culture and context in every interaction.

The Scope of Psychology

A science of mind, behaviour and context

Psychology spans health, education, technology, organisations, justice, sport and community systems.

Clinical & counselling

Assessment, formulation and therapeutic support.

Health psychology

Behaviour change, adherence and integrated care.

Neuropsychology

Brain-behaviour relationships and cognition.

Organisational

People, performance, leadership and well-being.

Forensic

Law, risk, rehabilitation and expert practice.

Human factors

Designing safer systems around real behaviour.

EMERGING FRONTIERS

Digital mental health

Behavioural data

Trauma-informed systems

Cultural psychology

Career pathways depend on accredited qualifications, supervised experience and local regulatory requirements.

A Nationwide Learning Network

Built for diverse classrooms and care settings

A shared workshop language can connect learners across institutions while respecting local context.

MULTI-DISCIPLINARY

Students • educators • health professionals

CASE-BASED

Shared scenarios, multiple perspectives

MENTOR-LED

Guidance, feedback and reflective practice

From Theory to Thoughtful Action

Psychology is often oversimplified

The workshop replaces myths and memorisation with scientific thinking, ethical boundaries and practical application.

THE SHIFT

What You Can Become Ready For

Capability before title

The program develops transferable foundations; professional titles require the relevant accredited degree

1**Observer**

Notice behaviour without rushing to judgment.

2**Communicator**

Listen, reflect and ask purposeful questions.

3**Formulator**

Connect patterns, context, strengths and risk.

4**Research reader**

Interpret evidence and recognise limitations.

5**Ethical practitioner**

Work within competence and refer appropriately.

6**Systems thinker**

See the person, family, culture and service context.

CAREER AREAS TO EXPLORE

Clinical • Counselling • Health • Rehabilitation • Organisational • Forensic • Sports • Educational • Research • Human Factors

Three-Month Learning Journey

Foundation → application → professional readiness

A staged pathway with increasing complexity, feedback and learner responsibility.

1

MONTH 01

FOUNDATIONS

Core concepts • scientific thinking • observation • reflective journal

2

MONTH 02

APPLIED PRACTICE

Case formulation • counselling micro-skills • assessment literacy

3

MONTH 03

CAPSTONE

Supervised project • presentation • feedback • career roadmap

EACH PHASE INCLUDES

LIVE / RECORDED SESSIONS

PRACTICE TASKS

MENTOR FEEDBACK

REFLECTION

Core Topics

A clear foundation in psychological science

Advanced Topics Added

Contemporary concepts for deeper practice

 Trauma-informed care Safety, trust, choice and avoiding re-traumatisation.	 CBT case formulation Situation–thought–emotion–behaviour–body cycles.
 Motivational interviewing Partnership, evocation, autonomy and change talk.	 Psychometrics Reliability, validity, norms, bias and test limitations.
 Cultural formulation Identity, explanatory models, power and access.	 Digital mental health & AI Privacy, evidence, bias, boundaries and escalation.

Mental Health as a Continuum

Move beyond “well” versus “ill”

Mental health changes over time. Context, function, distress, duration, safety and strengths all matter.

NOTICE

Changes in mood, thinking, sleep, energy, relationships and daily function.

ASK

Use open, non-leading questions; clarify duration, impact and safety.

SUPPORT

Listen, validate, identify strengths and practical next steps.

REFER

Escalate when risk, complexity or scope exceeds your competence.

A workshop is educational—not diagnosis or treatment.

Seek qualified professional or emergency support when safety is at risk.

Case Formulation: The 5 Ps

Organise complexity without reducing the person

A formulation is a revisable hypothesis—not a label. It connects history, triggers, maintaining cycles, strengths and context.

Practice prompt: What evidence supports the hypothesis? What alternative explanations fit? What information is still missing?

Measure Carefully

A score is never the whole person

Good assessment combines purpose, consent, suitable tools, contextual interpretation and clear communication.

**1****Before**

Define the referral question and obtain informed consent.

2**During**

Use standardised administration; notice accessibility needs.

3**After**

Integrate multiple sources; explain uncertainty and limits.

4**Always**

Use tools only within training, permission and professional scope.

Counselling Communication

Presence is an intervention

Effective helping conversations combine attentive behaviour, purposeful questions, reflection and boundaries.

Open questions

Invite narrative without interrogation.

Affirmations

Name effort, values and strengths.

Reflections

Offer meaning back tentatively.

Summaries

Organise themes and confirm understanding.

A SIMPLE CONVERSATION ARC

DO

Listen • validate • clarify • check understanding • discuss next steps

AVOID

Arguing • diagnosing casually • promising secrecy • working beyond scope

Evidence-Informed Building Blocks

Match the response to need, preference and scope

These approaches are introduced conceptually and through supervised educational practice.

1

Psychoeducation

Shared understanding using clear, non-stigmatising language.

2

Behavioural activation

Small, values-linked actions that rebuild routine and reward.

3

Grounding & regulation

Orienting, paced breathing and sensory stabilisation.

4

Problem solving

Define, generate options, choose, act and review.

5

Relapse prevention

Recognise patterns, early signs, supports and response plans.

6

Referral & collaboration

Connect people to appropriate qualified care and services.

Recognise ▪ Ask ▪ Connect

Responding when safety may be at risk

Direct, calm questions about self-harm or suicide do not create risk; they help clarify urgency and connect support.

1**RECOGNISE**

Hopelessness ▪ withdrawal ▪ sudden change ▪ giving away possessions ▪ stated intent

2**ASK DIRECTLY**

“Are you thinking about hurting yourself or ending your life?”

3**STAY & LISTEN**

Remain calm, take the person seriously and do not leave imminent risk alone.

4**CONNECT**

Contact local emergency services, a crisis line or a qualified mental health professional.

5**DOCUMENT & FOLLOW UP**

Record facts, actions and handover according to policy and role.

If danger is immediate: follow local emergency protocol. Never promise absolute confidentiality where safety is at risk.

Trauma-Informed Care

Ask “what happened?” before “what is wrong?”

Trauma-informed work prioritises safety and choice without assuming trauma or requiring disclosure.

Burnout, Moral Injury & Resilience

Support people—and improve systems

Resilience is not simply individual toughness. Workload, control, fairness, values, community and recovery shape well-being.

BURNOUT

Exhaustion • cynicism •
reduced efficacy

MORAL INJURY

Distress when systems
prevent value-aligned care

RESILIENCE

Adaptation supported by skills,
people and systems

THE THREE-LEVEL RESPONSE

SELF

Recovery rhythms, boundaries,
self-compassion.

TEAM

Peer support, debriefing,
psychological safety.

SYSTEM

Staffing, workload, fair process,
access to care.

Reflection prompt: Which stressors can I influence personally, which need team action, and which require organisational change?

Innovation must remain accountable

Technology can expand access, but it also introduces new questions about evidence, equity, privacy and

1

Consent

Do people understand purpose, limits and data use?

2

Privacy

What is collected, stored, shared or inferred?

3

Bias

Who was represented—and who may be harmed?

4

Evidence

Does the claim exceed the quality of research?

5

Boundaries

Is this education, support, screening or treatment?

6

Escalation

Can risk be recognised and handed to a human safely?

HUMAN OVERSIGHT IS A SAFETY FEATURE.

Digital tools should augment—not replace—qualified judgment, informed consent and accountable care.

ACCREDITED CERTIFICATIONS.

Every learner receives industry-recognised, accredited certificates on completion of the internship, industrial training and capstone project modules.

INTERNSHIP CERTIFICATE
Accredited Certification
