MENTORSHIP PROGRAM / BATCH 2026

Who We Are

Edufyi Tech Solutions transforms the educational journey of college students through cutting-edge virtual internships and industry-grade training. Every learner works alongside practising market professionals on six real-time and capstone projects per domain — building the evidence portfolio that converts interviews into offers.

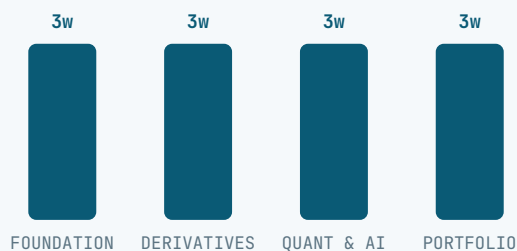

MISSION

Equip students with virtual internships and real-world market projects for successful career placement through industry mentorship.

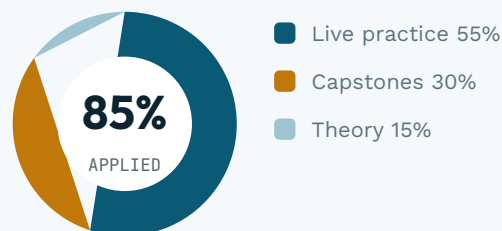

VISION

Transform education by linking academic learning with practical trading and research experience.

Why Learners Choose Edufyi

Mentor-led, not recorded

Every session is live with practising market professionals, plus 1:1 review checkpoints.

Built on real market data

Labs run on live NSE/BSE data, real option chains and broker sandbox APIs.

Portfolio over certificates

You graduate with six defensible projects that interviewers can actually inspect.

Placement-facing support

Resume rebuild, mock panels and curated interview question banks by role.

Skill Progression Curve

What's New vs. The Classic 60-Day Track

- + Options greeks & volatility surface labs
- + Machine-learning signal research
- + Factor investing and portfolio optimisation
- + Python algo-trading and backtesting engine
- + Market microstructure & order-flow reading
- + Macro, sector rotation & event trading

Curriculum / Foundation Track

1

Market Architecture & Instruments

WEEK 1

- Primary vs. secondary markets, exchange plumbing, clearing and settlement (T+0/T+1)
- Equities, bonds, ETFs, REITs, InvITs, sovereign gold bonds and index construction
- Participants: retail, HNI, FII/DII, market makers, prop desks and their footprints

2

Fundamental Analysis & Valuation

WEEK 2

- Balance sheet, P&L and cash-flow forensics; detecting earnings management
- Ratio stack: P/E, P/B, ROCE, ROE, EV/EBITDA, DuPont decomposition
- DCF, relative valuation, sum-of-the-parts and scenario-based fair value modelling

3

Technical Analysis & Price Action

WEEK 3

- Candlestick psychology, chart patterns, trend structure and multi-timeframe context
- Indicators done right: EMA stacks, RSI divergence, MACD, ATR, Bollinger, VWAP
- Volume profile, market profile and building rule-based entry/exit checklists

Live Lab / Reading a Chart Like a Desk Analyst

TREND

BULLISH

RSI(14)

61.2

ATR

1.8%

Curriculum / Derivatives Track

4

Futures, Forwards & Hedging

WEEK 4

- Contract specs, margining (SPAN + exposure), roll-over analytics and basis trading
- Cash-and-carry arbitrage, calendar spreads and portfolio hedging with index futures

5

Options Theory & The Greeks

WEEK 5

- Black-Scholes intuition, implied volatility, IV rank and the volatility smile/skew
- Delta, gamma, theta, vega, rho — position-level and portfolio-level greek management
- Strategy playbook: spreads, straddles, strangles, iron condors, ratio and calendar plays

6

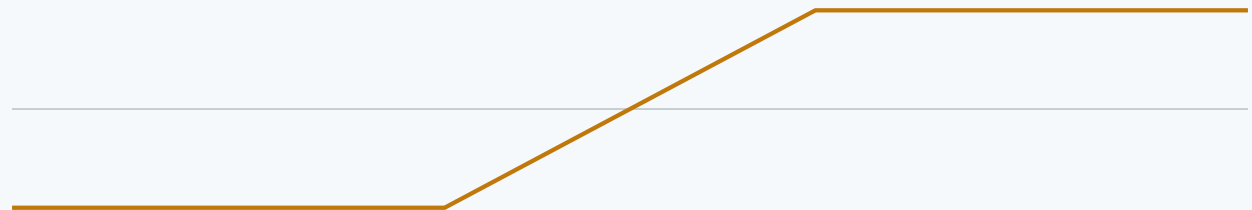

Market Microstructure & Order Flow

WEEK 6

- Order book dynamics, liquidity, slippage, impact cost and smart order routing
- Order types in practice: market, limit, stop, bracket, cover, iceberg and TWAP/VWAP

Greeks Dashboard / Sample Position Book

STRATEGY	DELTA	GAMMA	THETA	VEGA	P/L
Bull call spread	+0.34	+0.02	-12	+18	+8.4%
Short strangle	-0.05	-0.04	+46	-64	+12.1%
Iron condor	+0.01	-0.02	+31	-28	+5.7%
Long straddle	0.00	+0.06	-58	+92	-2.3%

PAYOFF / BULL CALL SPREAD

Curriculum / Quant, Algo & AI

7

Quantitative Research & Factor Investing

WEEK 7

- Statistics for markets: returns distributions, stationarity, correlation vs. cointegration
- Factor models — value, momentum, quality, low-vol, size; building a multi-factor screener
- Pairs trading and mean-reversion research with z-score entry bands

8

Algorithmic Trading with Python

WEEK 8

- Data pipelines with pandas, broker APIs, paper-trading and live order automation
- Backtesting engine design: vectorised vs. event-driven, slippage and cost modelling
- Walk-forward validation, overfitting traps and strategy performance attribution

9

AI & Machine Learning for Markets

WEEK 9

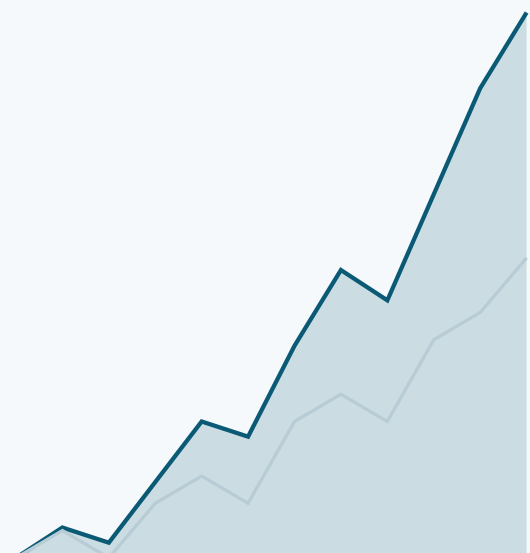

- Feature engineering from price, volume, fundamentals and alternative data
- Classification & regression signals, LSTM/gradient-boosting baselines, model risk
- NLP sentiment from news, filings and social feeds for event-driven alpha

Backtest Snippet

```
signal = (fast_ma > slow_ma) & (rsi < 70)
pos    = signal.shift(1).fillna(0)
ret    = pos * px.pct_change() - cost
equity = (1 + ret).cumprod()
sharpe = ret.mean()/ret.std()*252**0.5
```

Strategy vs. Benchmark

STRATEGY

NIFTY 50

36-month simulated walk-forward result

Risk, Psychology & Portfolio

10

Risk Management & Position Sizing

WEEK 10

- Value-at-Risk, expected shortfall, beta hedging and stress testing a book
- Kelly-informed sizing, R-multiples, stop discipline and drawdown recovery maths

11

Behavioural Finance & Trading Psychology

WEEK 11

- Loss aversion, herding, anchoring, recency and overconfidence in live decisions
- Trading journals, checklists and process metrics that neutralise bias

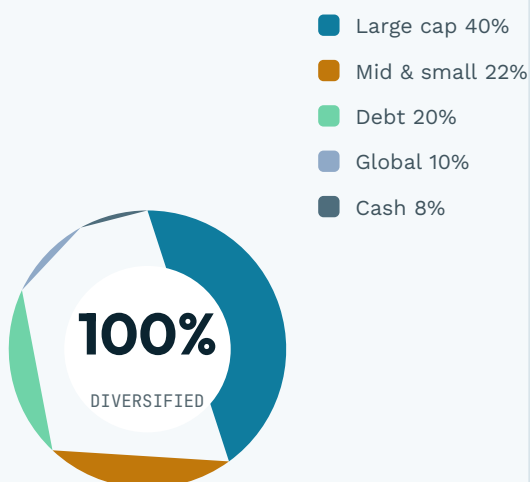

12

Portfolio Construction & Macro Strategy

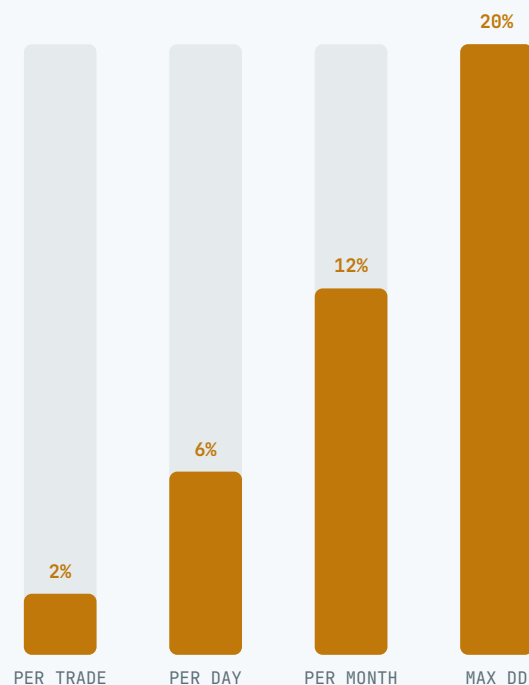

WEEK 12

- Mean-variance optimisation, risk parity, rebalancing bands and tax-aware investing
- Interest rates, inflation, currency and sector rotation across the business cycle

Model Portfolio Allocation

Risk Control Dashboard

Hard risk limits enforced in every capstone book

Capstone Projects & Toolstack

1

Equity Research Report

Full DCF + thesis on a listed company, defended in a mentor review.

2

Options Strategy Book

Design, paper-trade and report a 30-day multi-leg options book.

3

Python Backtesting Engine

Build a reusable event-driven backtester with cost modelling.

4

ML Signal Research

Feature pipeline, model, walk-forward validation and error analysis.

5

Sector Rotation Model

Macro-driven allocation model with quarterly rebalance rules.

6

Personal Portfolio Plan

Risk-profiled, tax-aware long-term portfolio with review cadence.

Interview drill

Most-asked equity, derivatives and quant interview questions with model answers.

Resume & cover

Finance-specific resume rebuild, project framing and LinkedIn positioning.

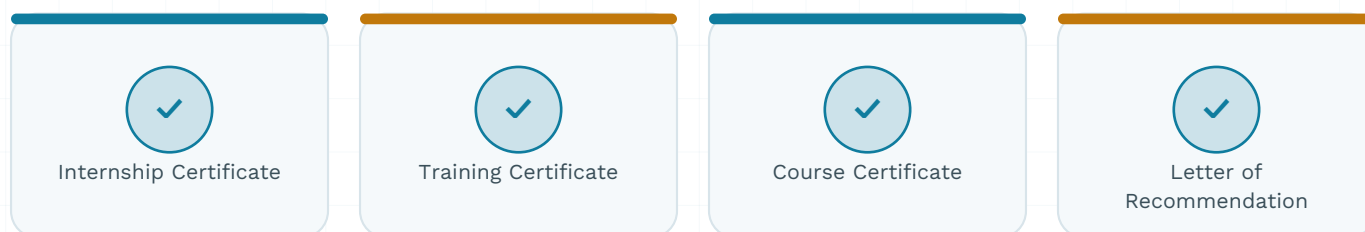

Mock interviews

Panel-style mocks with practising analysts and structured feedback.

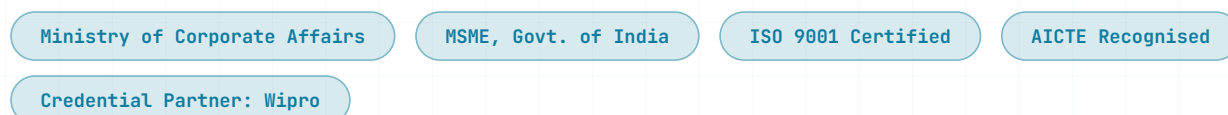

How You Join & What You Earn

- 1 **Schedule a demo call**
Explore the curriculum and career fit with a mentor.
- 2 **Choose your track**
Pick the plan matching your goals, budget and timeline.
- 3 **Enrol & onboard**
Get your cohort, mentor, tools and project roadmap.
- 4 **Engage for 90 days**
Live sessions, labs, weekly reviews and capstone builds.
- 5 **Graduate with proof**
Portfolio, certificates and interview-ready positioning.

Certifications Awarded

Approvals & Recognition

Hiring & Tie-Up Partners

Accredited Certifications

Every learner receives industry-recognised, accredited certificates on completion of the internship, industrial training and capstone project modules of the Stock Market Mastery track.

INTERNSHIP CERTIFICATE

Verified internship completion credential

ACCREDITED

INDUSTRIAL TRAINING

Industrial training hours certified

ACCREDITED

PROJECT COMPLETION

Capstone project completion proof

ACCREDITED

Wipro DICE ID Accredited

Credentials are digitally verifiable and can be shared directly on LinkedIn, resumes and campus placement portals.

What Each Certificate Proves

Internship

90 days of mentor-supervised market work

Industrial training

Structured hours across 12 advanced modules

Capstone project

Six shipped, reviewed and defended projects

Recommendation

Mentor letter based on measured performance
